projektu BUSSK**

**19.11.2012 Bratislava, ÚVS, Bárdošova ul.**

## Čo je EkoFond

- EkoFond, je neinvestičný fond zriadený a podporovaný SPP zo zisku po zdanení
- Cieľom je podpora ochrany a tvorby životného prostredia, efektívneho využívania energie a podpora aktivít zameraných na ne
- Cieľovou skupinou sú verejnoprospešné a nepodnikateľské subjekty, najmä školy a školské zariadenia, mestá, obce, neziskové organizácie, ale aj jednotlivci

## Čo je EkoFond (2)

### Aktivity EkoFondu:

- Grantové programy
  - GP 01 – Kogenerácia a trigenerácia na báze zemného plynu
  - GP 02 – Zlepšenie energetickej hospodárnosti budov
  - GP 03 – Podpora zavádzania plynových tepelných čerpadiel
  - GP 04 – Podpora nových progresívnych technológií na báze zemného plynu
  - GP 05 – Podpora využitia alternatívneho motorového paliva CNG
- Partnerské projekty – spolupráca s inými neziskovými resp. neinvestičnými subjektmi na ich aktivitách v súlade s účelom EkoFondu
- Vlastný projekt – EkoFond pre školy

# EkoFond pre školy

## Aktivity pre základné školy

- Interaktívne hry
- Platforma
- Každoročné súťaže pre ZŠ
- Putovná výstava Energia 3. tisícročia

## Aktivity pre stredné školy

- Rozvoj nového študijného programu **Technik energetických zariadení budov**

## Aktivity pre vysoké školy

- GP 04
- Vydávanie publikácií

## EkoFond medzinárodne

- Projekt REFUGE – Obnoviteľné zdroje pre budúce generácie ako hlavný partner
  - Príručka povolání v oblasti obnoviteľných zdrojov energie, ktorá sa využije aj v našom projekte BUSSK
  - Učebné texty o OZE pre študijný odbor TEZB
  - [www.refuge.ekofond.sk](http://www.refuge.ekofond.sk)
- Projekt Build-up Skills Slovakia – ako partner
  - Zodpovednosť na medializáciu projektu – leták o projekte, webová stránka, mediálne výstupy
  - Zapojenie sa do pripomienkovania výstupov projektu a využitie aktivít EkoFondu v oblasti OZE

## Webová stránka BUSSK

- [www.builupskills.eu](http://www.builupskills.eu)
- [www.slovakia.buildupskills.eu](http://www.slovakia.buildupskills.eu)
- Webová stránka je riadená centrálné, my máme len určité prístupové heslá do backoffice
- Hlavná stránka projektu – vytvorená, dá sa vložiť aj slovenský text
- Stránka poskytuje len základné formátovanie obsahu, pridávať atribúty pod článkom a v pravej časti stránky
- Nie je možné stránku hlbšie členiť, nie je možné vytvárať samostatné sekcie alebo kategórie

# Hlavná webová stránka programu

The screenshot shows the website for the Build Up Skills program in Ireland. The page is titled "National projects: Ireland" and provides detailed information about the project's goals and partners.

**Project short description:**  
The Residential and Commercial/Public Sector accounted for approximately 43% of energy consumption in Ireland in 2009 (SEAI, 2010). Data from the Quarterly National Household Surveys (CSO, 2011) indicates that the number of people directly employed in the construction industry peaked at 269,900 in 2007 but has now declined to 109,900 in 2010. It has been estimated that 1,000,000 Irish houses will require retrofitting by 2020. This combined with a target to achieve a low carbon standard for new buildings by 2015 and minimum renewable energy supply requirements for buildings will mean those working in or entering the construction sector need new specific energy skills. The Build Up Skills for Ireland (BUSI) Consortium has brought together key players with Project Management, Education and Training, Consultation and Networking skills. The BUSI partners will be supported by a Steering Committee which includes Strategic Stakeholders e.g. Sustainable Energy Authority of Ireland, Department of Communications Energy and Natural Resources and others. The Roadmap will be developed following a robust consultation process with the relevant stakeholders.

# Hlavná webová stránka SK projektu

The screenshot shows a web browser window displaying the 'BUILD UP SKILLS ENERGY TRAINING FOR BUILDERS' website. The page is titled 'National projects: Slovakia' and includes a navigation menu with 'Home', 'National projects', 'EU Activities', 'Calendar', 'Library', and 'About'. The main content area features a 'Project short description' section with two paragraphs of text. The first paragraph discusses the objective of the initiative, and the second paragraph lists the consortium members. To the right, there is a 'Project Coordinator' section with the ZSPS logo and a 'Project Partner List' section with logos for EkoFond, TOLU, and SIEA. Below these is a 'National Projects' section with a list of countries from A to F.

**Project short description**

The objective of the Initiative BUILD UP SKILLS SLOVAKIA is to prepare the first steps of the National Policy of the Vocational Education Improvement in Construction Sector for the blue collar workers (on-site workers) and construction supervisors, to face the challenges of the green economy, especially the "new" energy, i.e. energy efficiency and renewable sources. The focal object of the proposed Initiative is the sector of Buildings. Even though all phases of the building lifecycle are important from the viewpoint of the energy consumption, the most important is the construction of buildings. Therefore, the skills level of construction craftsmen is crucial for the low energy consumption of new constructed and major renovated buildings.

The project will be led by the Association of Construction Entrepreneurs of Slovakia (Zväz stavebných podnikateľov Slovenska – ZSPS) with assistance of other 4 consortium members: the Building Testing and Research Institute (Technický a skúšobný ústav stavebný – TSUS), the Congress and Educational Centre (Ústav vzdelávania a služieb), the Slovak Innovation and Energy Agency (Slovenská inovačná a energetická agentúra – SIEA) and EkoFond, non investment fund established by the Slovak Gas Company. The project is planned for 18 months and is divided into 5 work packages. Each work package is lead by some of the consortium members. For WP1: Project management – ZSPS, WP 2: Analysis of the national status quo – TSUS, WP3: Development of the road map – ÚVS, WP 4: Endorsement activities – SIEA, WP 5: EU exchange activities – ZSPS; Dissemination and exploitation of the project and its results (which is included in all other work packages) – EkoFond.

Primary target groups of the project are the employees of construction companies and installers of building services equipment as well as other on-site employees. In terms of professions, the project will focus primarily on wallers, window installers, installers of shading devices, thermal insulation and waterproofing installers, plasterer, carpenters, plumbers, heating and cooling devices installers, air-conditioning installers, heat pump and photovoltaic installers, as well as lighting installers. The secondary target groups are construction supervisors in the meaning of their ability of an in-deep check of all above mentioned professions' work outputs.

**Calendar of events in Europe**

The calendar of event informs about activities within the BUILD UP Skills Initiative as well as about events related to the Initiative.

In each participating country a series of meetings with stakeholders will take place until the end of 2013. These meetings are part of the national qualification platforms. Furthermore representatives of all national projects meet twice a year to exchange know-how and findings.
